EXPERIENCE

FULL STACK ENGINEER – MEDNOW AFRICA

2024

<https://mednowafrica.com>

As part of the team, my key responsibilities were:

- Implementing integration with KCB Funds Transfer API and Payment Notification API.
- UI/UX development of client-side applications for staff and clients using React JS and Chakra UI.
- Implementing CI/CD for both applications using Docker.
- Implementing custom business logic in GraphQL using Hasura.
- Implementing authentication and role-based access using Auth0.
- Creating and managing organizational emails on Google Workspace.

FULL STACK DEVELOPER – GOWI ODERA (CONTRACT)

2024

<https://oderagowi.com>

In the creation of the client's consultancy website, my roles were:

- Creating a design system using Tailwind CSS and Figma.
- UI development using Next JS.
- Implementing a blog and blog editor using Sanity headless CMS.
- Deployment and hosting with a custom domain.

FULL STACK DEVELOPER – BADILICO (CONTRACT)

2023

<https://badilico.com>

On this contract, my roles were:

- Creating a design system using Tailwind CSS and Figma.
- Implementing a graphics rich gamified website using Next JS.
- Deployment and hosting on a custom domain.

UI/UX DESIGNER AND DEVELOPER - EXECUTIVE CAR HUB

2022

<https://executive-car-hub.vercel.app>

My key responsibilities were:

- Designing and prototyping of an online car rental website using Figma.
- Creating a design system using Figma and Tailwind CSS.
- Implementing business logic for car renting and tracking.

ACTIVITIES

Besides designing and writing code, Wayne Logan delights in reading novels, surfing Instagram, attending social events, hiking and sleeping.
